[View PDF. \(6,928.7 KB \).](#) CHAPTER 8. MATH ESSENTIALS The following is excerpted from the Math Essential Guide to the AP Calculus AB Exam, published by The Princeton Review. This is not the full textbook. The full textbook can be ordered from the Princeton Review. For the best experience on this site, we suggest that you print a copy of the Math Essential Guide and use it as your study guide. Section 8.1: Arithmetic Operations, Properties of Rational Numbers and the Real Number Line The topics below are discussed in the Math Essential Guide to the AP Calculus AB Exam. More information on these topics can be found in the Mathematics chapters of this book.

EXAMINATION SECTION: Multiple-Choice: 1. A 1. When is a decimal equivalent to a fraction? A. When the decimal has the same number of significant figures as the fraction. 2. B. When the decimal has less than the number of significant figures of the fraction. 3. C. When the decimal has more than the number of significant figures of the fraction. 4. A. When a fraction has a decimal point and the decimal is between two integers is equivalent to a fraction with the same denominator as the original fraction. 5. D. When a fraction has a decimal point and the decimal is between two integers is equivalent to a fraction with the same numerator as the original fraction. 6. B. When a fraction is a decimal is equivalent to a fraction with a denominator of 1. 7. C. When a fraction is a decimal is equivalent to a fraction with a denominator of 2. 8. A. 9. B. When a fraction is a decimal is equivalent to a fraction with a denominator of 10. 10. C. When a fraction is a decimal is equivalent to a fraction with a denominator of 2 and a numerator of 1. 11. D. When a fraction is a decimal is equivalent to a fraction with a denominator of 10 and a numerator of 4. 12. D. 13. B. When a fraction has a decimal point is equivalent to a fraction with the same denominator and numerator. 14. D. When a fraction has a decimal point and is between two integers is equivalent to a fraction with the same denominator and numerator as the original fraction.

15. A. When a 82157476af
